STUDIES IN MEDICAL INNOVATIONS: A SELECTED RESEARCH BIBLIOGRAPHY

by

Prakash C. Sharma, Ph.D.
Department of Sociology

PREFACE

The present bibliography contains over 150 selected references on Studies in Medical Innovations published chiefly during 1930-1972. The references listed in the bibliography are by no means definitive nor are they meant to be, but they represent many of the old and current publications which may be used as guides for further research.

The bibliography is divided into Two parts: Part One contains the listing of books and monographs in that area and Part Two is a listing of articles appearing in related periodicals. The listings are arranged by the author in alphabetical order when possible.

I would especially like to thank Mrs. Hershel Marks for typing the bibliography and Mrs. Mary Vance, Editor, Council of Planning Librarians, for her encouragement, editorial assistance and partial financial support for the work. The sole responbibility for any errors and/or omissions is mine.

It is my hope that those engaged in the diffusion, adoption, and research in medical innovations will find this bibliography a useful and informative instrument.
